

Job Description and information:

CONSTRUCTION PIPEFITTER

The work involves putting together, installing and maintaining various pipe systems. The Construction Pipefitter installs both high and low pressure pipes that carry hot water, steam and other liquid gases, especially those in industrial and commercial buildings. One may specialize in refrigeration, oil, gas fitting or steam fitting. The job requires working in high places and enclosed spaces, climbing, bending, stooping, crawling, kneeling, lifting, and working in extreme temperature ranges. The work includes layout, fabrication, assembly, installation, and the maintenance of piping and piping systems, appurtenances, and equipment for steam, hot water, heating, cooling, lubricating, and industrial processing systems, on the basis of knowledge or system operation and study of building plans or working drawings. Select type and size of pipe and related materials according to job specifications. Cut or drill holes in walls for the passage of pipes. Inspect work sites to determine presence of obstructions and to ascertain that holes will not cause structural weakness. Plan the sequence of installation to avoid obstructions and activities of other construction workers. Cut pipe, using threading machine. Assemble and install a variety of metal and nonmetal pipe and pipe fittings, including those made of brass, copper, lead, glass and plastic.

Join piping by means of threaded, caulked, wiped, soldered, brazed, fused, or cemented joints. Secure pipes to structure with clamps, brackets, and hangers using hand tools. Install and maintain refrigeration and air-conditioning systems including compressors, pumps, meters, pneumatic and hydraulic controls, and piping. Test piping system for leaks by increasing pressure in pipes and observing gauges attached to pipes for indication of leaks. Must have a working knowledge of building and mechanical codes. May weld supports to structural steel members.

QUALIFICATIONS for *Construction* applicants:

- Must be 18 years of age or older.
- Must be a U.S. high school graduate or possess a State issued GED certificate State issued GED certificate/transcript. The GED must have been obtained through an approved GED testing center recognized by the GED Testing Service; documentation must be furnished at time of application. While technical college training is not required to apply, if technical college training is to be considered, applicants must provide copies of diplomas, course completion certificates, or transcripts at time of application.
- If requested, the applicant shall furnish the committee with a written statement from a medical doctor that he/she has had a physical examination in connection with the application, and are physically fit to perform the work of a pipefitter
